

Robert Černý

**Sharp constants for Moser-type
inequalities concerning embedding into
Zygmund spaces**

MATH-KMA-2012/384

January 2012

Submitted

1999 – 2010

For the details on papers submitted in specified years see the web page of the preprint series.

2011

- MATH-KMA-2011/355 Marek Cúth: *Separable reduction theorems by the method of elementary submodels*
- MATH-KMA-2011/356 Stanislav Hencl, Pekka Koskela, Tomi Nieminen: *Dimension gap under conformal mappings*
- MATH-KMA-2011/357 C.S. Barroso, O.F.K. Kalenda and P.-K. Lin: *On the approximate fixed point property in abstract spaces*
- MATH-KMA-2011/358 Ana L. Bernardis, Amiran Gogatishvili, Francisco Javier Martín-Reyes, Pedro Ortega Salvador and Lubo Pick: *The one-sided A_p conditions and local maximal operator*
- MATH-KMA-2011/359 O.F.K. Kalenda and J. Spurný: *On a difference between quantitative weak sequential completeness and the quantitative Schur property*
- MATH-KMA-2011/360 Petr Hájek and Michal Kraus: *Polynomials and identities on real Banach spaces*
- MATH-KMA-2011/361 R. Černý: *Note on the Concentration-Compactness Principle for generalized Moser-Trudinger inequalities*
- MATH-KMA-2011/362 Pavel Ludvík and Jiří Spurný: *Descriptive properties of elements of biduals of Banach spaces*
- MATH-KMA-2011/363 O.Kalenda and W.Kubis: *Complementation in spaces of continuous functions on compact lines*
- MATH-KMA-2011/364 R. Černý: *On generalized Moser-Trudinger inequality without boundary condition*
- MATH-KMA-2011/365 R. Černý, A. Cianchi and S. Hencl: *Concentration-compactness principle for Moser-Trudinger inequalities: new results and proofs*
- MATH-KMA-2011/366 Stanislav Hencl and Petr Honzík: *Dimension of images of subspaces under Sobolev mappings*
- MATH-KMA-2011/367 S. Hencl and L. Kleprlík: *Composition of q -Quasiconformal mappings and functions in Orlicz-Sobolev spaces*
- MATH-KMA-2011/368 R. Černý: *Generalized n -laplacian: semilinear Neumann problem with the critical growth*
- MATH-KMA-2011/369 Maurizio Grasselli, Dalibor Pražák: *Longtime behavior of a diffuse interface model for binary fluid mixtures with shear dependent viscosity*
- MATH-KMA-2011/370 Martin Koc and Luděk Zajíček: *A joint generalization of Whitney's C^1 extension theorem and Aversa-Laczkovich-Preiss extension theorem*
- MATH-KMA-2011/371 B. Opic: *Continuous and compact embeddings of Bessel-potential-type spaces*
- MATH-KMA-2011/372 P. Gurka and B. Opic: *Sharp Hardy inequalities of fractional order involving slowly varying functions*
- MATH-KMA-2011/373 Luděk Zajíček: *Singular points of order k of Clarke regular and arbitrary functions*
- MATH-KMA-2011/374 Jan Malý: *Non-absolutely convergent integrals with respect to distributions*
- MATH-KMA-2011/375 Peter Bella, Eduard Feireisl, Dalibor Pražák: *Long time behavior and stabilization to equilibria of solutions to the Navier-Stokes-Fourier system driven by highly oscillating unbounded external forces*
- MATH-KMA-2011/376 Ondřej Kurka: *Genericity of Frechet smooth spaces*
- MATH-KMA-2011/377 Miroslav Kačena, Ondřej F.K. Kalenda and Jiří Spurný: *Quantitative Dunford-Pettis property*
- MATH-KMA-2011/378 Miroslav Kačena, Luca Motto Ros and Brian Semmes: *Some observations on A new proof of a theorem of Jayne and Rogers*
- MATH-KMA-2011/379 Stanislav Hencl and Kai Rajala: *Optimal assumptions for discreteness*
- MATH-KMA-2011/380 J. Duda, L. Zajíček: *Smallness of singular sets of semiconvex functions in separable Banach spaces*
- MATH-KMA-2011/381 Marek Cúth, Martin Rmoutil: *σ -porosity is separably determined*
- MATH-KMA-2011/382 Martin Rmoutil: *Products of non- σ -lower porous sets*

2012

- MATH-KMA-2012/383 Robert Černý and Petr Gurka: *Moser-type inequalities for generalized Lorentz-Sobolev spaces*
- MATH-KMA-2012/384 Robert Černý: *Sharp constants for Moser-type inequalities concerning embedding into Zygmund spaces*
