Requirements for obtaining the course credit for Stochastic Processes 2 (NMSA409)

Winter term 2019–2020

Criteria for obtaining the course credit, common for all the groups, are the following:

- obtaining at least 70 % of points from regular homeworks (Moodle);

- sucessfully passing two tests during the course, i.e. obtaining at least 70 % of the points in each test. For each test there will be exactly one chance to retake the test – one term common for all the groups.
