

Position Actuarial Analyst

Who We Are:

- World's leading insurance and reinsurance broker with a regional actuarial centre of excellence in Prague for the Central and Eastern Europe (CEE)
- Market leader in Central and Eastern Europe, providing service to more than 150 insurance companies in CEE

The Role:

- Analysis of pricing, reinsurance structure optimisation and risk quantification using non-life insurance mathematics and other statistical methods
- Technical analysis and innovative insight into insurance companies, their portfolios, reinsurance contracts.
- Managing / participating to actuarial projects
- Creating stochastic financial models in Aon Benfield's bespoke dynamic financial analysis software ReMetrica
- Regular internal, customer and reinsurer communication

Minimum Requirements:

- University degree in actuarial sciences (mathematics applied to insurance)
- A first experience in non-life insurance/Reinsurance would be an advantage
- Strong application oriented technical and structural thinking
- Excellent communication skills (written and verbal) in English
- Ability and willingness to learn and apply new methods, find own solutions
- Above-average computer skills (MS Office + other usual software)
- Flexibility and self-motivation
- Good communication skills
- Prepared to work hard

We Offer:

- Interesting and dynamic role in the global reinsurance industry
- Training to our advanced methods, including to Remetrica, our financial stochastic modelling tool
- Opportunity to work for the market leader in the CEE
- Competitive salary and attractive benefits package
