

OpenAnalytics

Job Opening Statistician

Profile

OpenAnalytics is an international company based in Belgium providing data analysis services and products across geographies and industrial sectors. We are looking to expand our team of statisticians with a candidate who fits the following profile:

- MSc / PhD in Statistics, Applied Mathematics or Computer Science interested to work on applied modeling problems
- team player and good communicator with fluency in English, verbal and written
- a sound knowledge of R is required, experience with BioConductor is an asset

Description

The successful candidate will

- interact with scientists from biotechnology and pharmaceutical companies in order to devise and implement analysis methods tailored to novel experiments
- perform data analyses on proof-of-principle experiments to assess the relevance of the new methods
- provide input to OpenAnalytics colleagues that develop the hardware and software infrastructure to integrate the novel methods in the business processes of our customers

Offer

We offer

- a pleasant and challenging environment in which each person can develop their talents
- opportunities to work on exciting problems at the edge of current knowledge and at the forefront of data analysis technologies
- competitive remuneration package and benefits in line with skills and experience

Applications and inquiries regarding the position can be sent to careers@openanalytics.eu until **August 31, 2012**.
