

Dear all,

I am currently screening for a \*home-based position for a Senior Clinical Biostatistician\*. You will work as a part of an international virtual team split between the USA and Asia and be responsible for delivering excellent statistical service to clients. You will design and manage studies in phases I-IV in different therapeutic areas and as the team grows, you might also have line management and training responsibilities.

This is an excellent chance to secure a fully home-based role with an international company so don't miss it. You can be based anywhere in Europe.

If you know anyone who might be interested please pass on my details.

We also are recruiting for a few roles in epidemiology analytics: in London or Basel.

In case these roles are not of interest but you are considering new career opportunities, drop me a line outlining your requirements.

P.S. Happy Valentine's Day! Please find below a few funny Valentine recruitment-themed gems from my team in Prague J

\*\*

Regards,

**\*Ivelina Georgieva\***
