24. V. Dolejší: Sur des méthodes combinant des volumes finis et des éléments finis pour l’écoulement des fluides compressibles sur des maillages non conformes I. February 1996, Prague–Marseille. (*in French*)
25. V. Dolejší: Sur des méthodes combinant des volumes finis et des éléments finis pour l’écoulement des fluides compressibles sur des maillages non conformes II. September 1996, Prague–Marseille. (*in French*)
26. V. Dolejší and J. Felcman: Numerical Solution of Compressible Flow through Cascade of Profile. May 1996, Prague.
27. V. Dolejší and J. Felcman: Multilevel Adaptive Methods for the Solution of the Euler Equation. May 1996, Prague.
28. V. Dolejší and J. Felcman: Computation of Viscous Compressible Flows in the GAMM–channel. May 1996, Prague.
29. V. Dolejší M. Feistauer and J. Felcman: Algebraic turbulence models for unstructured meshes. September 1998, Prague.

### E5 Software products

30. V. Dolejší: Barycentric finite volumes for NS equations. MFF UK Praha, 1996. Version 1.0, 410 kB.
31. V. Dolejší: Anisotropic mesh generator. MFF UK Praha, 1996. Version 1.0, 270 kB.
32. V. Dolejší: Higher order schemes for FVM. MFF UK Praha, 1996. Version 1.0, 80 kB.
33. V. Dolejší: Anisotropic mesh generator. MFF UK Praha, 1997. Version 2.0, 260 kB.
34. V. Dolejší: Combined triangular FV - FE schemes for compressible flow. MFF UK Praha, 1998. Version 1.0, 600 kB.
35. V. Dolejší: ANGENER 3.0, Anisotropic mesh generator. MFF UK Praha, 2000. Version 3.0, 280 kB.
36. V. Dolejší: FVEM 1.0, Combined FV and FE methods for the simulation of compressible flow. MFF UK Praha, 2000. Version 1.0, 1130 kB.
37. V. Dolejší: DGM 1.0, Discontinuous Galerkin method for the simulation of compressible flow. MFF UK Praha, 2001. Version 1.0, 800 kB.
38. V. Dolejší: DGM 2.0, Discontinuous Galerkin method for the simulation of compressible flow. MFF UK Praha, 2002. Version 2.0, 1.2 MB.
39. V. Dolejší: DGM 3.0, Discontinuous Galerkin method for the simulation of compressible flow. MFF UK Praha, 2003. Version 3.0, 1.4 MB.
40. V. Dolejší: DGM-impl 1.0, Semi-implicit Discontinuous Galerkin method for the simulation of inviscid compressible flow. MFF UK Praha, 2003. Version 2.0, 1.2 MB.
41. V. Dolejší: DGFEM 1.0, Discontinuous Galerkin finite element method for convection-diffusion problem. MFF UK Praha, 2004. Version 1.0, 2.1 MB.

42. V. Dolejší: ADGFEM 2.0, Adaptive discontinuous Galerkin finite element method for the Euler equations, MFF UK Praha, 2005. Version 2.0, 2.1 MB.
43. V. Dolejší, J. Hozman: ADGFEM 3.0, Adaptive discontinuous Galerkin finite element method for the Navier-Stokes equations, MFF UK Praha, 2006. Version 3.0, 4.8 MB.
44. V. Dolejší, J. Hozman: ADGFEM 4.1, Adaptive discontinuous Galerkin finite element method for the Navier-Stokes equations, MFF UK Praha, 2007. Version 4.1, 5.1 MB.
45. V. Dolejší, J. Hozman: ADGFEM 5.1, Adaptive discontinuous Galerkin finite element method for the Navier-Stokes equations, MFF UK Praha, 2008. Version 5.1, 5.9 MB.

#### **E6 Posters**

46. V. Dolejší: Simulation of viscous compressible flow. *3rd European Mathematical Congress*, Barcelona, Spain, July 10–14, 2000
47. V. Dolejší: Anisotropic mesh adaptation method for viscous compressible flows. *ICTAM 2000 congress*, Chicago, USA, August 27–September 2, 2000
48. V. Dolejší: A higher order scheme based on the finite volume approach. *Finite Volumes for Complex Applications III (Problems and Perspectives)*, Porquerolles, France, June 24–28, 2002.
49. V. Dolejší, J. Feclman: Anisotropic mesh adaptation for transonic and supersonic flow simulation. *Algoritmy 2002*, 16th Conference on Scientific Computing, Podbanske, Vysoke Tatry, Slovakia, September 9–13, 2002.

#### **E. Invited lectures**

1. Compressible Flow Solvers, keynote lecture, Workshop of Mathematical Aspects of Computational Fluid Dynamics, Oberwolfach, Germany, November 9–15, 2003.
2. Higher Order Numerical Schemes for Hyperbolic Systems with an Application in Fluid Dynamics, Eleventh International Conference on Hyperbolic Problems Theory, Numerics, Applications, Lyon, France, July 17-21, 2006
3. Study of the BDF-DGFE method for the solution of the compressible Navier-Stokes equations, Computational Methods with Applications, Harrachov, Czech Republic, August 19-25, 2007
4. On the solution of linear algebraic systems arising from the semi-implicit DGFE discretization of the compressible Navier-Stokes equations, Conference Algoritmy, Podbánské, Slovakia, March 16-20 , 2009
5. Discontinuous Galerkin finite element method: from numerical analysis to application to compressible flow simulation, The Eighth European Conference on Numerical Mathematics and Advanced Applications (ENUMATH), Uppsala, Sweden, July 29 - June 3, 2009

#### **G. Survey papers**

#### **H. Patents**

#### **I. Thesis/Disertations**

1. V. Dolejší: Combined Finite Volume–Finite Element Methods for Compressible Flow on Unstructured Meshes, Charles University Prague and Université Méditerranée Marseille, PhD Thesis, 1998 (partly written in French).
2. V. Dolejší: Adaptive higher order methods for compressible flow. Charles University Prague, Faculty of Mathematics and Physics, Habilitation thesis, Prague, 2003.
3. V. Dolejší: Discontinuous Galerkin method for convection-diffusion problems with applications in fluid dynamics. Charles University Prague, Faculty of Mathematics and Physics, Doctoral thesis, Prague, 2008.

## **K. Other publications**

- ZBL**
1. V. Dolejší, M. Feistauer, J. Felcman: Výpočtová matematika a počítačová dynamika tekutin. *Pokroky matematiky, fyziky a astronomie*, **47**(3):206-220, 2002.
  2. Charles University Prague, Faculty of Mathematics and Physics, publikace k 50. výročí založení MFF UK, několik obrázků a krátký komentář, 2002.

## **J. Participation on grants**

### **J1** Odpovědný řešitel za MFF UK

1. Adaptivní metody vyššího řádu pro stlačitelné proudění, postdoktorandský grant GA ČR, 201/00/D/116, září 2000 - srpen 2003.
2. Dynamika čerpacího systému pro dopravu suspenzí, GA ČR, 101/03/0229, 2003-2005.
3. Numerická simulace nestacionárního proudění stlačitelných tekutin pomocí metod vyššího řádu přesnosti, GA UK, 316/2006/B-MAT/MFF, 2006-2008.
4. Adaptive Higher-Order Variational Methods for Aerodynamic Applications in Industry (ADIGMA), Research project No. AST5-CT-2006-030719 financed within the 3<sup>rd</sup> Call of the 6<sup>th</sup> European Framework Programme, 2006-2009.

### **J2** Člen řešitelského kolektivu

5. Kvalitativní teorie a numerická analýza problémů dynamiky tekutin, GA ČR, 201/99/0267, 1999-2001.
6. Matematická a numerická analýza problémů mechaniky tekutin, GA ČR, 201/02/0684, 2002-2004.
7. Adaptivní metody pro řešení nelineárních diferenciálních rovnic s aplikacemi v mechanice tekutin a ochraně životního prostředí, GA UK, 3/1998/B MAT/MFF, 1998-2000.
8. Počítačová simulace třírozměrného proudění pomocí adaptivních metod, GA UK, 275/2001/B-MAT/MFF, 2001-2003.
9. Počítačová simulace nestacionárního proudění, GA UK, 343/2005/B-MAT/MFF, 2005-2007.
10. Numerická simulace proudění v oblastech s proměnnou geometrií, GA UK, 344/2005/B-MAT/MFF, 2005-2007.
11. Matematická teorie a numerická simulace problémů mechaniky tekutin, GA ČR, 201/05/0005, 2005-2007.

## **L. Lectures at conferences, seminars and workshops**

1. Numerical solution of the compressible Navier - Stokes equations. Doctorands week, Charles University, Prague, September 1995
2. On numerical schemes for transonic flow problems. Workshop Prague-Heidelberg, University of Heidelberg, Germany, November 1995
3. Combine finite volume - finite element methods for transonic flow. Seminar: Institute of Mathematic, Université de Pau, France, May 1996
4. Finite volumes methods on unstructured meshes for compressible flow, Seminar: IMT, Université Méditerranée, Marseille, France, May 1996
5. Finite Volume Methods on Unstructured Meshes for Compressible Flows. Finite Volumes for Complex Applications (Problems and Perspectives), Rouen, France, July 15 -18, 1996

6. Anisotropic mesh adaptation. Seminar of Department of Numerical Mathematics, Charles University of Prague, April 1997
7. Anisotropic mesh adaption for unstructured meshes Workshop: Domain Decomposition and Multifields in Fluid Dynamics and Solid Mechanics. Hirsheg, Austria, November 1997
8. Anisotropic mesh adaption for unstructured meshes. Seminar of Mathematisches Institute, University of Stuttgart, Germany, November 1997
9. Numerical simulation of compressible flows using combined finite volume–finite element methods on unstructured grids. Seminaire: “Modeles et calculus pour la mecanique des fluids”, IRPHE, Université Aix-Marseille I et II, France, April 6, 1998
10. Analysis of a combined finite volume–finite element method for nonlinear convection–diffusion problem. Seminaire: “Les équations differentielles partielles”, Université Aix-Marseille I et II, France, May 26, 1998
11. Adaptive Methods for the Numerical Simulation of the Compressible Navier–Stokes Equations. ECCOMAS 98, Athens, Greece, September 7–11, 1998.
12. Analysis of a combined finite volume–finite element method for nonlinear convection–diffusion problem. Seminar of Department of Numerical Mathematics, Charles University of Prague, October 22 and November 12, 1998
13. Numerical Schemes for Hyperbolic Systems - Application in Fluid Dynamics. 8<sup>th</sup> International Conference on Hyperbolic Problems, Magdeburg, Germany, February 28– March 3, 2000
14. Anisotropic Mesh Adaptation Technique for Viscous Flow Simulation. Première Conférence Franco-Tchèque sur la Méchanique des Fluides Mathématique, Marseille, France, March 20–24, 2000
15. Adaptative method for simulation of compressible viscous flow. Seminar of Continuum Mechanics, Charles University of Prague, April 17, 2000
16. Anisotropic mesh adaptation technique for finite volume and finite element methods. Seminar of the Department of Mathematics, University Hamburg, Germany, Juny 23, 2000
17. Adaptation of Triangular Meshes in Continuum Mechanics. Numerical Modeling in Continuum Mechanics. 4<sup>th</sup> Summer Conference, Prague, 31st July–3rd August 2000
18. Numerical simulation of compressible viscous flow. 16<sup>th</sup> IMACS World Congres 2000, EPFL Lausanne, Switzerland, August 21 –25, 2000.
19. Numerical Simulation and Adaptive Methods for Transonic Flow. ECCOMAS 2000, Barcelona, Spain, September 11–14, 2000
20. Numerical methods for partial differential equations. Seminar of Department of Numerical Mathematics, Charles University of Prague, October 12, 2000
21. On the combined finite volume - finite element methods for nonlinear convection-diffusion problems. Seminaire équations aux dérivées partielles non lineaires, Université Paris-Sud, Laboratoire de Mathematique, France, December 7, 2000
22. Discontinuous Galerkin Method, (together with prof. M. Feistauer, Seminar of Continuum Mechanics, Charles University of Prague, May 14, 2001
23. Discontinuous Galerkin Method, (together with prof. M. Feistauer, Seminar of Numerical Mathematics, Charles University of Prague, May 17, 2001

24. Discontinuous Galerkin method for compressible flow, 4<sup>th</sup> Seminar Euler and Navier Stokes Equations, Institute of Thermodynamics, Academy of Science, Prague, May 23-25, 2001
25. Piecewise linear numerical approximation in plane domains. Programme ERASMUS - SOCRA-TES, Serie of lectures at University of Hamburg, Germany, June 11–22, 2001.
26. The Use of Discontinuous Galerkin Method for the Numerical Solution of Convection-Dominated Problems, ENUMATH conference, Ischia, Italy, July 23–27, 2001.
27. Numerical simulation of compressible flow through cascade of profiles. Seminar/Summer School CFD for Turbomachinery Applications, Gdansk, Poland, September 1–3, 2001.
28. AMA-method independent adaptive technique for triangular grid. Summer school "Software and Algorithmus in Numerical Mathematics", Kvilda, Czech Republic, September 3–7, 2001.
29. Mathematical Background of the Anisotropic Mesh Adaptation Technique. Seminar des DFG-Sonderforschungsbereichs 393, Numerische Simulation auf massiv parallelen Rechnern, Chemnitz, Germany, September 17, 2001.
30. Anisotropic Mesh Adaptation–Method Independent Adaptive Technique. Chemnitz Finite Element Method Symposium 2001, September 19–21, 2001
31. Anisotropic mesh adaptation technique for inviscid and viscous flow computation. AMFLOW 2001, Workshop on Adaptive Methods for Flow Computation, Heidelberg University, October 22–24, 2001.
32. On the use of the anisotropic mesh adaptation technique for computation of science problems, Seminar Politechnika Warszawska, Warsaw, Poland, November 23, 2001.
33. Discontinuous Galerkin method for high speed flow. Workshop Heidelberg–Prague, Heidelberg, Germany, December 7–8, 2001.
34. The use of discontinuous Galerkin method for compressible flow simulations. Seminar of Mathematical Institute of AS Czech Republic, *Current problems in numerical analysis*, Prague, June 7, 2002.
35. Numerical methods for convection-diffusion equations. Programme ERASMUS - SOCRA-TES, Serie of lectures at University of Hamburg, Germany, June 10–15, 2002.
36. A higher order scheme based on the finite volume approach. Finite Volumes for Complex Applications III (Problems and Perspectives), Porquerolles, France, June 24–28, 2002.
37. Numerical solution of the compressible Navier-Stokes equations with the aid of the discontinuous Galerkin method. 2nd Czech–France conference: Mathematical Fluid Mechanics, Třešť, Czech Republic, July 24–28, 2002.
38. Anisotropic mesh adaptation for transonic and supersonic flow simulation. Algoritmy 2002, 16th Conference on Scientific Computing, Podbanske, Vysoke Tatry, Slovakia, September 9–13, 2002.
39. An alternative formulation of the anisotropic mesh adaptation method. FE Symposium, Chemnitz, Germany, September 23–25, 2002.
40. On the discontinuous Galerkin method for the numerical solution of convection–diffusion problems. Centre of Applied Mathematics, West Bohemia University, Plzeň, November, 7, 2002.
41. On the discontinuous Galerkin method for the numerical solution of the Navier-Stokes equations. Workshop Dresden – Prague, Numerical methods for partial differential equations and control, November, 29, 2002.

42. La simulation numérique de l'écoulement des fluids compressibles, Université Rennes I, Rennes, France, May 7, 2003.
43. La simulation numérique de l'écoulement des fluids compressibles, Université de Bretagne Occidental, Brest, France, May 13, 2003.
44. Anisotropic mesh adaptation method for computational mechanics problems, 2<sup>nd</sup> MIT Conference on Computational Fluid and Solid Mechanics, Cambridge, USA, June 16-19, 2003.
45. Discontinuous Galerkin finite element method for compressible flow, Kolloquium in Angewandter und Numerische Mathematik, Mathematisches Institut der Universität Basel, June 27, 2003.
46. On the discontinuous Galerkin finite element method for the numerical solution of the compressible Navier–Stokes equations, ENUMATH 2003 conference, Prague, August 18-22, 2003.
47. Discontinuous Galerkin Method for the Compressible Flow Simulation, EFMC conference, Toulouse, France, August 24-28, 2003.
48. The discontinuous Galerkin method for the numerical solution of the compressible flows, 16th Chemnitz FEM Symposium 2003, Chemnitz, Germany, September 22-24, 2003
49. Compressible Flow Solvers, Seminar of Numerical Mathematics, Charles University Prague, November 6, 2003
50. Introduction aux méthodes de Galerkin discontinues, Groupe de travail Volumes Finis / Galerkin discontinu, Université de Provence, Marseille, France, January 19, 2004
51. Méthodes de Galerkin discontinues pour les systèmes de lois de conservation Groupe de travail Volumes Finis / Galerkin discontinu, Université de Provence, Marseille, France, January 26, 2004
52. Discontinuous Galerkin finite element method for convection-diffusion problems, Séminaire d'analyse appliquée, Université de Provence, Marseille, France, February 3, 2004
53. Adaptation des maillages anisotropiques pour les équations aux dérivées partielles, série of lectures in the frame of SOCRATES-ERASMUS, ESM2, Université Méditerranée, Marseille, March 15 - 19, 2004
54. On a numerical simulation of multiphase flow with a virtual mass effect, Seminar of Numerical Mathematics, Charles University Prague, January 6, 2005.
55. Analysis of a semi-implicit discontinuous Galerkin finite element method for nonlinear convection-diffusion problems, Workshop on Numerical Analysis Prague-Dresden, May 27, 2005
56. Anisotropic mesh adaptation technique for the partial differential equations, SIAM Conference on Mathematical and Computational Issues in the Geosciences, Avignon, France, June 7-10, 2005
57. On Finite Volume Schemes for Nonconservative Hyperbolic Problems, Finite Volumes for Complex Applications IV, Marrakech, July 4 – 8, 2005
58. On a semi-implicit discontinuous Galerkin finite element method for nonlinear convection-diffusion problems, The Sixth European Conference on Numerical Mathematics and Advanced Applications, Santiago de Compostela, Spain, July 18 – 22, 2005
59. Semi-implicit discontinuous Galerkin finite element method for nonlinear convection-diffusion problems, Seminar of Numerical Analysis , Mathematical Institute of Academy of Science, Prague, December 9, 2005

60. Numerical simulation of inviscid compressible flow by higher order numerical schemes, The 8th WSEAS International Conference on Automatic Control, Modeling and Simulation, Prague, Czech Republic, March 12-14, 2006
61. An efficient implementation of the semi-implicit discontinuous Galerkin method for compressible flow simulation, Programs and Algorithm of Numerical Mathematics, Prague, Czech Republic, May 28-31, 2006
62. Analysis of a higher order semi-implicit discontinuous Galerkin finite element method for nonlinear convection-diffusion problems, The Mathematics of Finite Elements and Applications, Brunel University, West London, UK, June 13–16, 2006
63. Higher Order Numerical Schemes for Hyperbolic Systems with an Application in Fluid Dynamics, Eleventh International Conference on Hyperbolic Problems Theory, Numerics, Applications, Lyon, France, July 17-21, 2006 (invited talk)
64. Semi-implicit discontinuous Galerkin method for the solution of the compressible Navier-Stokes equations, European Conference on Computational Fluid Dynamics, Egmond aan Zee, The Netherlands, September 5-8, 2006
65. Numerical simulation of compressible flows with the aid of the BDF - DGFE scheme, ICCSME conference, Chania, Greece, October 26 -November 1, 2006
66. Higher order semi-implicit discontinuous Galerkin finite element method for nonliner unsteady convection-diffusion problems, University of Marburg, Germany, November 6, 2006
67. Anisotropic mesh adaptation technique for the simulation of compressible flows Institute of Aeronautics & Applied Mechanics, Warsaw University of Technology, Poland, December 4-5, 2006
68. Perspectives of DGM for convection-diffusion problems with nonlinear diffusion, Workshop on Numerical Analysis Prague-Dresden, Königstein, Germany, April 20-21, 2007
69. *hp* error estimates of DGFEM for nonlinear convection-diffusion equations, European Finite Element Fair 2007, Marseille, France, May 17-19, 2007
70. Higher order semi-implicit discontinuous Galerkin finite element method for the solution of the compressible Navier-Stokes equations, International Congress on Industrial and Applied Mathematics, Zürich, Switzerland, July 16-20, 2007
71. Study of the BDF-DGFE method for the solution of the compressible Navier-Stokes equations, Computational Methods with Applications, Harrachov, Czech Republic, August 19-25, 2007
72. *hp*-IIPG method for convection-diffusion problems, European Conference on Numerical Mathematics and Advanced Applications, Graz, Austria, September 10-14, 2007
73. Discontinuous Galerkin finite element method for convection-diffusion problems: Numerical Analysis, Baptist University of HongKong, Department of Mathematics, Hong Kong, October 26, 2007
74. Discontinuous Galerkin finite element method for convection-diffusion problems: Application to compressible flow simulations, Baptist University of HongKong, Department of Mathematics, Hong Kong, October 26, 2007
75. Discontinuous Galerkin method, elliptic linear problems and application to compressible flow simulations (invited lectures), Seminar on Numerical Analysis, Liberec, January 31, 2008
76. Discontinuous Galerkin finite element method for nonlinear convection-diffusion problems, Workshop Heidelberg-Prague, University of Heidelberg, Germany, May 7-9, 2008

77. On linear algebraic systems arising from the DGFE method for the compressible Navier-Stokes equations, Workshop Dresden-Prague, Staré Splavy, Czech Republic, October 10-11, 2008
78. Analysis of Discontinuous Galerkin method (invited lectures), 35<sup>th</sup> CFD VKI/ADIGMA course, Brussel, Belgium, October 16-17, 2008
79. Interior penalty discontinuous Galerkin methods: analysis and applications to compressible flow simulations, Université Paris 6, France, January 26, 2009
80. Discontinuous Galerkin method and applications to compressible flow, Seminar on Numerical Analysis, Ostrava, February 5-6, 2009, (invited lectures)
81. On the solution of linear algebraic systems arising from the semi-implicit DGFE discretization of the compressible Navier-Stokes equations, Conference Algoritmy, Podbánské, Slovakia, March 16-20 , 2009 (invited talk)
82. On the optimality of IPG methods for odd degrees of polynomial approximation, The Mathematics of Finite Elements and Applications, Brunel University, West London, UK, June 9–12, 2009
83. Discontinuous Galerkin finite element method: from numerical analysis to application to compressible flow simulation, The Eighth European Conference on Numerical Mathematics and Advanced Applications (ENUMATH), Uppsala, Sweden, July 29 - June 3, 2009 (invited talk)
84. Efficient solution strategy for the discontinuous Galerkin method applied to steady-state compressible flow, University of Kiel, January 28, 2010
85. Solution of linear algebra systems arising from the compressible Navier-Stokes equations, Seminar on Numerical Analysis, Ostrava, February 18-20, 2010, (invited lectures)
86. Modern methods for the numerical solution of partial differential equations, Seminar in Differential Equations, Bořetice, Czech Republic, May 31 - June 4, 2010 (series of lectures)
87. Modern numerical methods for the solution of PDR, Project: Development of research team for parallel computing, Technical University Liberec, June 21, 2010
88. Semi-implicit discontinuous Galerkin finite element method for the steady state compressible flows, ECCOMAS 20010, Lisbon, Portugal, June 14 - 17, 2010
89. Higher order methods for numerical simulations of compressible flows, Workshop Flow modelling in aircraft and industrial applications, VZLÚ Praha, September 23, 2010
90. *hp*-discontinuous Galerkin method for compressible flows, The International Conference Presentation of Mathematis 2010, Technical University Liberec, October 21-22, 2010.
91. Implementation of finite element and discontinuous Galerkin methods, Project: Development of research team for parallel computing, Technical University Liberec, January 21, 2011.
92. *hp*-DGFE method for compressible flow simulation, 16<sup>th</sup> International Conference Finite Elements in Flow Problems, Technical University München, March 23-25, 2011.
93. DGFE method for convection-diffusion problems: *hp*-strategy, European Finite Elements Fair 2011, Paris, France, June, 3-4 2011
94. An adaptive *hp*-discontinuous Galerkin approach for nonlinear convection-diffusion problems, Applications of Mathematics 2012, Prague, Czech Republic, May, 2-5 2012

95. *hp*-discontinuous Galerkin method for nonlinear problems, International Conference Presentation of Mathematics'12, Technical University Liberec, June, 21-22 2012
96. *hp*-anisotropic mesh adaptive technique based on interpolation error estimates, Applications of Mathematics 2012, Prague, Czech Republic, May, 15-18 2013
97. Perspectives of discontinuous Galerkin method for the numerical solution of computational fluid dynamics problems Programy a algoritmy numerické matematiky 17, Dolní Maxov, Czech Republic, June, 8 - 13 2014
98. Anisotropic *hp*-adaptive discontinuous Galerkin method for numerical solution of partial differential equations, ESCO 2014, Pilsen, Czech Republic, June, 18 2014

#### **M. Educational and Scientific Stays**

1. 1 week, December 1993, Winter School: Navier–Stokes Equations, Paseky, Czech Republic.
2. 1 week, July 1994, Sommer School: Industrial Mathematic and Mathematical Modeling, Rybníky, Czech Republic.
3. 5 months, April 15, 1995– September 15, 1995: PhD Study, Université Méditerranée, Marseille, France
4. 5 months, February 1, 1996–June 30, 1996: PhD Study, Université Méditerranée, Marseille, France
5. 1 week, May 1996, Université Pau, France
6. 1 month, November 1–30, 1996: PhD Study, Université Méditerranée, Marseille, France
7. 1 month, November 1–30, 1997: Universität Stuttgart, Germany.
8. 6 months, December 1, 1997–May 30, 1998: PhD study, Université Méditerranée, Marseille, France
9. 1 week, June 19–23, 2000: Universität of Hamburg, Germany.
10. 2 weeks, December 4–15, 2000: Université Paris-Sud, Orsay, France.
11. 1 week, January 15–19, 2001: ETH Zurich, Switzerland.
12. 1 week, January 22–26, 2001: University of Hamburg, Germany.
13. 2 weeks, June 11–22, 2001: University of Hamburg, Germany.
14. 1 week, September 17–21, 2001: Technical University of Chemnitz, Germany.
15. 3 days, November 22–24, 2001: Politechnika Warszawska, Warsaw, Poland.
16. 1 week, February 25–March 1, 2002: ETH Zurich, Switzerland.
17. 1 week, June 10–14, 2002: University of Hamburg, Germany.
18. 1 week, November 25–30, 2002: Technical University of Dresden, Germany.
19. 1 month, January 15–February 15, 2004: Université de Provence, Marseille, France, MdC visité.
20. 1 week, March 15 -20, 2004: ESM2, Universite Mediterranee, Marseille, France
21. 4 months, September – December, 2004: Université de Provence, Marseille, France, CNRS position.

22. 2 days, November 6-7, 2006, University of Marburg, Department of Mathematik, Marburg, Germany
23. 2 days, December 4-5, 2006, Institute of Aeronautics & Applied Mechanics, Warsaw University of Technology, Poland
24. 1 week, October 24 - 30, 2007, Baptist University of HongKong, Department of Mathematics, Hong Kong
25. 1 week, January 26 - 30, 2009, Université Paris 6, Laboratoire J. Lions, France
26. 1 week, January 26 - 30, 2010, University of Kiel, Germany
